Plasson

Plasson fittings are tested and approved by WRAS to PN16. In addition, Plasson have recognition under quality standard ISO9001/2000. Plasson fittings are used for conveying water and other fluids in urban and inter-urban infrastructure landscapes and farming applications.

Connections (AML) aim to keep as much of the range in stock, however some slower moving or non-stock items may be ordered direct from the manufacturer. Please note that at time of order any delivery date given is approximate and a small delivery cost may be implemented for non stock items.

Plasson Pushfit Fittings

Plasson pushfit provides connectivity of PE pipe to a variety of plumbing pipe materials including PE, PB, PEX, and Copper. Inserting the pipe into the fitting to the stop creates both the seal and the grip on the pipe.

Plasson pushfit is the new name for PlassOne fittings, which are supplied without liners and provide a 16 Bar rated joint to PE pipe and is suitable for above and below ground use. Simplicity of assembly makes the professional's job easier whilst retaining the Plasson reliability.
